1. Users(

user-id int,

first-name varchar(20) not null,

mid-name varchar(20)

last-name varchar(20)

city varchar(20)

State varchar(20)

zipcode char(6)

gmail varchar(20)

password varchar(20)

DOB DATE

age() int

Biodata TEXT

usertype varchar(20)

primary key (user-id)

check usertype in (admin, user, creator)

2. MCQ(

q-id int,

ques TEXT, not null

opt-1 varchar(100) not null

opt-2 varchar(100) not null

opt-3 varchar(100)

opt-4 varchar(100)

ans ~~varchar(100)~~ int not null

explanation TEXT,

creator-id int,

primary key (q-id)

check ans in (1, 2, 3, 4)

foreign key (creator-id) references Users)

3. DESCQ (

q-id int

ques TEXT not null

ans TEXT not null

creator-id int

primary key (q-id)

foreign key (creator-id) references user)

4. Comment (

user-id int not null

description TEXT not null

comnt-on int not null

~~reply to~~ ~~int~~

type Varchar(20)

time TIMESTAMP

primary key (user-id, comnt-on, type, time)

foreign key (user-id) references User

check type in (MCQ, DES, ART)

5. Phone (

user-id int

phone-num char(10) ~~not null~~

primary key (user-id, phone-num)

foreign key (user-id) references User)

6. Updates(

creator-id int

description TEXT not null

time TIMESTAMP

primary key (creator-id, time)

foreign key (creator-id) references Users)

7. feedback(

fb-id int

user-id int

feedback TEXT not null

time TIMESTAMP

primary key (fb-id)

8. liked ~~ques~~

user-id int

ID int

type varchar(20)

primary key (user-id, ID, type)

check type in (MCQ, DES, ART)

foreign key (user-id) references Users

foreign key (ID) references MCQ, DESCQ, ARTICLE)

9. ARTICLE(

art-id int

creator-id int not null

time TIMESTAMP not null

content TEXT not null

primary key (art-id)

foreignkey (creator-id) reference User)

10. Completed(

user-id int

ID int

type varchar(20)

primary key (user-id, ID, type)

check type in (MCQ, DESCQ, ARTICLE)

foreignkey (user-id) references User

foreignkey (ID) references MCQ, DESCQ, ARTICLE)

11. todo(

user-id int

ID int

type ~~int~~ varchar(20)

primary key (user-id, ID, type)

check type in (MCQ, DESCQ, ARTICLE)

foreignkey (user-id) references User

foreignkey (ID) references MCQ, DESCQ, ARTICLE).

12. TAGS (

ID int

type varchar(20)

tag varchar(20)

primary key (ID, type, tag)

check type in (MCQ, DESCQ, ARTICLE)
